these medical volumes is, as is one said without doubt, the chief of the collection, have some association value, either to the subject or the collector, and many are annotated, containing letters written to Osler or notes and bookplates of interest as well.

Also included are 13 holograph letters signed by Osler, including one about the death of his friend Francis Minot, Revere, Harvard professor of medicine, memorial banquets, biographical notices, what-

The catalogue contains some 3,000 entries and even a few
